

Figure 1 The figure shows the results of the analysis of the data from the 1000 Genomes Project. The figure is a bar chart showing the distribution of genetic variants across different populations. The x-axis represents the population, and the y-axis represents the number of variants. The data is as follows:

Population	Number of Variants
Admixed American	10,000,000
East Asian	10,000,000
European	10,000,000
South Asian	10,000,000
Yoruba	10,000,000
